[Decompiler InstallShield Limited](#)

The screenshot shows the InstallShield software interface for a project named 'TestIISDeployment - InstallShield [Basic MSI Project]'. The main window is titled 'Installation Requirements' and contains several sections:

- Installation Requirements:** A section for specifying software and operating systems required by the installation. It includes a list of operating systems with checkboxes: Windows Server 2012 R2, Windows 8.1, Windows Server 2012, Windows 8, Windows Server 2008 R2, Windows 7, Windows Server 2008, Windows Vista, Windows Server 2003, and Windows XP.
- Required Software:** A list of software components that need to be installed on the machine, including Adobe Reader 10.0, Microsoft .NET Framework 2.0, 3.0, 3.5, 4.0, 4.5, Internet Explorer 7.0, 8.0, 9.0, Microsoft Office 2003, 2007, 2010, Windows PowerShell, and SQL Server 2008 Express SP1.
- Tasks:** A table at the bottom of the window showing error messages and their corresponding error codes.

Description	Error Code
InstallShield could not create the software identification tag because the Tag Creator ID setting in the General Information view is empty.	-7235
One or more of the project's components contain .NET properties that require the .NET Framework. It is recommended that the release include the .NET Framework.	-6245
Could not find dependent file cauevt.dll or one of its dependencies of component TestDotNetService	-6248
